DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

Claim 34, 45, & 56 are rejected under 35 U.S.C. 103(a) as being unpatentable over WIESE us005227156a and KOOISTRA, Jr. 3852441

Both references provide antimicrobial compositions based on zinc pyrithione salts, exemplified as shampoos. Both provide alkanolamines, not further limited by the instant, & seen as inclusive of the lauryldiethanolamide (example 1 of WIESE) & coconut diethanolamine (cream shampoo of KOOISTRA). Wiese also teaches stabilization of pyrithione is achieved with zinc oxide, hydroxide, & salts (acetate, cl) @ col. 3, lines 34-49 @ the instant ratios.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made desiring to utilize a antimicrobial shampoo, to use WIESE, modified with additives such as alkanolamines, or KOOISTRA, modified with the zinc stabilizedrs of WIESE, in order to provide acceptable application and include desired additives & excipients to increase feel, strength, & standard cosmetic features. The selection of each ingredient is a result effective parameter chosen to obtain the desired effects. It would be obvious to vary the nature of each ingredient to optimize the effects desired.

There is no unobvious and/or unexpected results obtained since the prior art is well aware of the use of amine compounds for enhancement and the use of ingredients for the functionality for which they are known to be used is not a basis for patentability.

Art Unit: 1615

Applicant has not provided any objective evidence of criticality, nonobvious or unexpected results that the administration of the particular ingredients' or concentrations provides any greater or different level of prior art expectation as claimed.

However, the rejections of record are withdrawn, in consideration of the amendments.
